**TANZANIA SHIPPING AGENCIES CORPORATION
TASAC**

ISO 9001:2015 CERTIFIED

PUBLIC NOTICE TO ALL LICENSED DRY PORT OPERATORS

The Tanzania Shipping Agencies Corporation (TASAC) wishes to remind all licensed Dry Port Operators that they are required to operate their facilities in full compliance with the **Tanzania Shipping Agencies (Dry Port) Regulations, GN No. 606 of 2025**, and all conditions attached to their respective licences.

In particular, all Dry Port Operators are hereby directed to ensure that the **yard occupancy/density does not exceed sixty percent (60%) of the approved operational yard capacity** at any time. This requirement is intended to ensure efficient cargo handling and storage, maintain adequate operational space, facilitate safe movement of cargo-handling equipment and vehicles, and prevent congestion within dry port facilities and applicable roads.

All licensed Dry Port Operators are required to:

- i. maintain yard occupancy at **not more than 60%** of the approved yard capacity;
- ii. establish and maintain an effective system for continuously monitoring yard occupancy and cargo dwell time;
- iii. establish truck holding area within the facilities.

Operators whose yard occupancy exceeds the prescribed **60% threshold** are required to take immediate corrective measures to restore the facility to the required operating level and the Port Operator shall not direct containers to the facility.

All Dry Port Operators are therefore urged to take the necessary measures to ensure **full and continuous compliance** with the Tanzania Shipping Agencies (Dry Port) Regulations, GN No. 606 of 2025 and the conditions of their respective licences.

Issued by:

Tanzania Shipping Agencies Corporation (TASAC)
